OUR PURPOSE

In a constantly changing world, flexibility, integrity, consistency and dependability are key traits. It is our intent to provide the health care professional with the highest quality products available in the new millennium. The process of providing these products will be backed by the same high level of service and technical support in order to assist you, the practitioner, in promoting whole-person wellness with each of your patients.

OUR HISTORY

Much of our product line has origins going back almost 50 years. These time-tested formulas have been enhanced with current, innovative micronized ingredients, better-assimilated capsules, non-controversial flow agents (MCTs), and the highest standard of quality components utilized. We are innovative in approach, yet strongly tied to proven homeo-nutritional methods. An example of this is our policy to use only hand successsion and glass bottles when preparing our homeopathic formulas the preferred 'Hahnemannian' way.

HOW WE ARE DIFFERENT

We have a unique perspective in that owners and managers are involved with all levels of operations, from the procurement of the highest quality ingredients to distribution and doctor consultations. We believe it is our attention to customer service that makes us different, but don’t take our word for it. Talk to your colleagues or experience it yourself. As a manufacturer, we often customize formulations and modify existing formulas to meet specific patient needs.

QUALITY INGREDIENTS

Our goal is to bring a consistent and efficacious line of products to the health care practitioner which can be relied on over and over again. Our strength lies in the crucial importance we place on the procurement of premium raw materials, the environment, quality controls, water purity, ethics, and the caliber of team members who make and distribute our products. For example, veggie caps are utilized for our vegetarian assurance. Our guarantee on all aspects of the production process, from raw material verification, documented lab procedures, bottling, labeling, boxing and shipping, assures you that your patients will be receiving the very best.

QUALITY CONTROLS

Our FDA-registered laboratory has documented and tested processes in place to insure that you and your patients receive the highest quality products possible. Enhanced Quality Verification is based on a team approach that focuses on a triple check process, a thorough and precise paper trail, and stringent procedures that assure the accuracy, potency and safety of each formulation. PCHF can provide you with a certificate of analysis of our products and certification by the New Zealand Ministry of Agriculture verifying that the glandular tissues used in our products are free of disease, herbicides, pesticides, steroids and antibiotics. Our homeopathics are prepared in a ‘clean room’ environment and undergo microbiological analysis to rule out contamination. Every mother tincture is cold percolated for at least 14 days and is agar-plate cultured in an incubator for 48 hours before approval for the next stage of manufacturing or quality control. We insure quality and consistency through careful attention to basics, such as using the purest pH balanced structured water available. This is accomplished through our 5-stage reverse osmosis water filter, a UV light bacterial eliminator, water softening and desired microwater pH regulation. Hypoallergenic ‘Kosher-certified’ alcohol is used as our base to guarantee purity.
FORMULAS YOU CAN DEPEND ON

Our philosophy is that the quality of our products is the highest priority with an understanding that customer satisfaction is based upon superior formulas, dependability and service. We have carefully chosen how to integrate the old and the new by keeping what works well while implementing those changes to formulas that doctors in the field have found clinically effective. We follow the concepts of homotoxicology and Enderlein principles when developing ‘homeo-nutritional / terrain balancing’ formulations for our product line. Our herbals and nutriceuticals provide the body with the biochemistry it needs while the homeopathics provide the energetic stimulation. It is this integration of all modalities that makes using PCHF products so effective.

CUSTOMER SERVICE ORDERING/SHIPPING POLICIES

Professional Complementary Health Formulas is dedicated to providing prompt service and personal attention to the health care professionals we serve. From technical support to the delivery of your order in a timely manner, we believe customer loyalty is earned and we pledge our best effort to provide you, the customer, the service you deserve. Our offices are open from 8:00 a.m. to 5:30 p.m. (Pacific time) Monday through Friday for your convenience. Orders called or faxed before noon will be shipped UPS or US Mail that day unless other forms of delivery are requested. Orders shipped to the east coast are expedited so that they are received in three days at no additional charge to you. Next Day and Second Day Air shipping service is available upon request at an extra charge. Initial orders are shipped COD or we accept VISA, Mastercard, or American Express. Upon completion and approval of a credit application, terms of Net 20 Days can be established. Accounts over 30 days are COD until the account is brought current. Orders over $200 are shipped with no shipping charge. Backorders are rare, but when they occur they are sent out as soon as product is available with no additional shipping/handling charges.

effectively extracted in other mediums. Since many plant constituents are not maximized to achieve the maximum yield. Alcohol is used as a solvent fiber to determine if we have achieved the purchased. The finished product is again carefully measured and analyzed when disturbance of the delicate balance of the plant’s oils selectively measured and sought so as to not extract the specific plant’s variable has been raised to the exact level optimum for majority of the plant’s biochemistry.

Professional Formulas is committed to providing the practitioner with the highest quality medicinal herbs at reasonable prices. We seek suppliers of raw materials who we find to be ethical, adhere to strict quality standards and offer consistency and dependability. To this end, we are pleased to offer our BotaniPure™ line, consisting of herbal medicines from around the world that meet our requirements.

These high-grade herbs are obtained as organic or wild-crafted whenever possible. They are harvested ethically to insure a renewable resource is retained. The processing of these herbs conforms to strict Australian or U.S. Government guidelines and are adhered to from the time the herb is procured to usage by the patient.

Processing of the liquid extracts is done via our ‘PureTemp’ process consisting of cold percolation and variable temperature manipulation, yielding a 1:2 extract ratio maximizing potency and obtaining the majority of the plant’s biochemistry. ‘PureTemp’ means the solvent temperature has been raised to the exact level optimum for extracting the specific plant’s variable constituents. These temperatures are selectively measured and sought so as to not disturb the delicate balance of the plant’s oils and other constituents. Raw material is carefully measured and analyzed when purchased. The finished product is again analyzed to assure activity as well as the plant fiber to determine if we have achieved the maximum yield. Alcohol is used as a solvent since many plant constituents are not effectively extracted in other mediums.

INTRODUCTION TO HERBAL MEDICINE

To appreciate Western herbal therapy, one assumes the body is capable of resisting disease, one considers the body’s normal physiology, and one is aware of pathophysiological processes. Allopathy focuses more on pathophysiology rather than why the ‘disease’ occurred in the first place. Traditional herbal medicine has a holistic action on the body. Herbs are often prescribed along with other herbs, homeopathic medicines or nutrients for an overall synergistic effect. Herbal medicine is becoming westernized to a point where herbs are thought of by which specific organ or system they effect; i.e., ‘good for the brain’ or ‘good for the heart’. The reality is that herbal medicine is meant to be utilized as both a systemic functional medicine and as an energetic balancing medicine.

PCHF believes herbal treatment should initially be focused on the large dose to optimize chemistry and enhance detoxification pathways. At the same time, the herb’s energetic qualities will assist in raising the vital energy of the body. Simply stimulating the vital energy by the use of small herbal dosing assumes the vital energy is capable of sustaining itself. This may be why many do not reach total resolution of their conditions and relapse. Many conditions require a more specific and immediate approach to altering aberrant biochemistry which is why certain herbs have become known for treating specific problems. A proper case history is often enough to allow prescribing based on the current presenting symptom profile, the pathology known to us and what proper physiology should be. While dosing with a specific herb, one may elect to use an herb that cleanses or changes physiology over a period of time to approach pathology, thus supporting the vital energy while changing the underlying terrain. Proper herb choice is based on:

1) Determination of the treatment goal; short- and long-term.
2) Individualization of care for the patient.
3) Focusing on the immediate priorities of treatment.
4) Consideration of secondary priorities and long-term goals of treatment.
5) Choosing well-known herbs having desired multiple-actions from a reliable source.
6) For desired specific effects, choose several herbs that overlap in action.
7) Limit the number of herbs in a formula so as not to dilute their action.

CONCENTRATION RATIOS

BotaniPure™ extracts are primarily 1:2 concentrations. A 1:2 concentration means that for every 1 gram of herb, there are 2 ml of alcohol solvent. This is equal to 500 milligrams per milliliter.

Conversely, a 4:1 extract (seen in tablet or capsule form) is 4 grams per 1 ml of solvent. This is equal to 4000 mg of dry herb.

DOSSING GUIDELINES

Most liquid herbal 1:2 extract doses are recommended at 1/2 to 1 teaspoon two to three times daily to attain a pharmacological clinical level. Please consult a recognized herbal text for exceptions to these general guidelines. In dosing small adults, children or animals, reduce by body weight (NOTE-normal dose levels are based on a 150 lb. individual).

CONSIDERATIONS

* Herbal alcohol extracts typically hold their therapeutic value well beyond suggested expiration periods.
* Storage of herbal extracts should be away from direct light in a cool dark place or refrigerated. It is further suggested that herbs are kept away from exposure to electro-magnetic fields such as the microwave.
* Those patients sensitive to the alcohol used in the liquid extracts can dilute them with small amounts of water or juice. Another method to minimize the alcohol levels is to allow it to evaporate by sitting or the following method:

  Boil water and pour into a tea cup. Allow cup to heat and then empty the hot water. Put the herb into the heated tea cup and allow it to sit for approximately 2 minutes. This is warm enough to evaporate alcohol without destroying the action of the herb.

OUR FORMULATIONS

PCHF is committed to providing the practitioner the highest quality Professional ‘Complementary Health’ Formulas available. We have formulated these homeopathic products based on input from numerous alternative healthcare practitioners. These formulations emphasize the common health conditions of today and those natural medicines practitioners have successfully treated with.

INTRODUCTION TO HOMEOPATHY

Homeopathic medicine has been used since its beginning in the eighteenth century. Homeopathy stimulates the body to ‘turn on’ its own healing mechanisms in pursuit of restoring homeostasis. Allopathic medicine treats disease by the suppression and regulation of symptoms or by attempting to destroy the microbes associated with the condition. We are learning more and more about when this approach is effective and when it is not. For example, take the increasing problems associated with the overuse of antibiotics. Erroneously, allopathy has attempted to destroy these microorganisms instead of creating a symbiotic relationship as found in nature. To date, homeopathic medicinals have little to no toxicity associated with them and direct the body toward balance. Homeopathy is based upon the ‘Law of Similars’ or ‘Like treating Like’. This law suggests similar symptoms caused by taking a substance in its raw form can be alleviated by taking the same substance in a highly diluted form. This dilution follows the premise put forth by the ‘Arndt-Schultz Law’ in which substances vary in action dependent upon the concentration being high, medium or minute; high concentrations inhibit, medium concentrations suppress, and minute concentrations stimulate. Isopathy is similar to homeopathy, but it is the law of exacts. A good example of this would be using homeopathically prepared grass pollen to treat grass sensitivity.

Homeopathic remedies are diluted (potentized) and manufactured under very strict and specific guidelines. Potentization consists of precise dilutions and hand succussion (vigorous shaking with sudden impact). The most common dilution (potentization) factors are decimal (X) and centesimal (C). This means that for each stage of potency, a remedy has been diluted by either a 1:10 or 1:100 measurement of the crude substance or previous potency to diluent (usually an ethanol/water mixture). A belladonna remedy at a 6X potency has been diluted 1:10 six times. This results in the final product possessing one part of the original substance in one million parts of finished ‘potentized’ product. Hand succussion (vigorous shaking/pounding) of each step of potentization is also an important component of the manufacturing process. This step causes agitation at the molecular bonding level of the remedy and energetically activates the remedy. Without the succussion and specific dilutions, the product is ineffective. These ‘hand succussed’ procedures (originated by Samuel Hahnemann) are followed in the preparation of all homeopathic products available from Professional Formulas.

Only the purest pH balanced water, a 5-stage reverse osmosis water filter, UV light bacterial eliminator and pH meters are used in all aspects of our homeopathic manufacturing.
CLINICAL EFFECTS BASED ON LEVEL OF POTENCY

Use low doses (1X-12X) for pharmacological support of acute problems and for stimulation of drainage. Use medium doses (12X-30X) for problems lasting longer than 10 days and symptom control. Use high doses (60X and up) for immediate effect on acute problems, constitutional or suppressed conditions.

DOSING GUIDELINES

Acute: when symptoms are immediate or severe, take under tongue 10-15 drops, or as dosage is listed, every 15 minutes not to exceed 3 hours total.

Subacute: when symptoms improve or are mild to moderate, take under tongue 10-15 drops, or as dosage is listed, every hour not to exceed 8 hours total.

Chronic: when symptoms last longer than 48 to 72 hours, take under tongue 10-15 drops as listed on the bottle.

Preventive: for maintenance of occasional symptoms or for a tendency toward the condition, take 10-15 drops once weekly or monthly or as needed.

RULES FOR TAKING REMEDIES

- Avoid mint and camphor as some remedies may be rendered less- or inactive.
- Coffee or tea should be avoided where they antidote.
- Do not take within 10-15 minutes of ingesting anything else orally.
- Store in cool, dark environment away from exposure to sunlight, microwave or other electromagnetic frequencies.

Note: Sensitive individuals may decrease the dose and/or put in a 1/2 tumbler of water and sip 1 teaspoon at a time. Beginning treatment by dosing 5 drops every 3 days and building to tolerance may be effective for some. Another method is to imbricate (rub-in) the dose on a vascular area of the skin. To dissipate off the alcohol, allow the formula to sit in a small amount of tepid water for a period of time, or perform the following procedure: Boil water and pour into a tea cup. Allow cup to heat and then empty the hot water. Put the homeopathic dose into the heated tea cup and allow to sit for approximately 2 minutes. Add a small amount of water and take or sip the dose. This is warm enough to evaporate alcohol without destroying the homeopathic action.
**ALLERSODE REMEDIES** (DESENSITIZATION)

Allersodes are homeopathic attenuations of antigens; i.e., substances which in moderate or large dose cause the production of antibodies. Diluted homeopathic doses "turn off" the body's hyper-responsiveness, thus desensitizing. Each PCHF allersode combination provides an array of common allergenic materials along with factors that promote nonspecific resistance to allergic stressors. Potencies of individual agents are in the 6X up to the 100X potency range. Desensitization protocols: For sensitive patients (those who have anaphylactic or cardio/respiratory responses), administer 1-10 drops in office depending on sensitivity and gradually increase to chronic dosage level (see below). For an allergic response (those with a sudden onset of 1 to 3 hours), use 10-15 drops every 15 minutes to 1 hour. As the severity of symptoms decrease, reduce to acute dosage levels (see following).

**ANIMAL MIX**

Provides factors that mitigate hypersensitivity to animal feathers, hair, dander, and other residues.

Adrenal 3X, 4X, ACTH 6X, 30X, Histamine 12X, Liver 6X, 12X, Camel, Cat (short and long haired), Chicken, Cow (short and long haired), Duck, Fish scale (fresh and salt water), Goat (angora/mohair), Goose, Guinea Pig, Hog, Horse, Llama, Mouse, Pheasant, Quail, Rabbit, Rat, Sheep (wool), Turkey, all at 6X, 12X, 60X, 100X, purified water, 20% USP alcohol.

ANTI INFLAMMATION FORMULATIONS
(CONDITION/SYMPTOM RELIEF)
Each PCHF homeopathic formulation provides a combination array of classical remedies, sarcodes and other attenuated agents relevant to the illness or symptom profile mentioned in the product description. Potencies of individual agents range from mother tincture (MT) to higher potencies (1000X) as appropriate in the context of the formula. Combination formulations are the number one type of homeopathy used worldwide today. The C-Formula ingredients are chosen from a systemic/homotoxicological approach based on years of clinical observations and practitioner feedback. PCHF blends scientific research and new innovative ideas with trial clinical use in developing the highest quality homeopathic medicinals effective for today’s problems and illnesses. (Refer to pg. 9 for dosing guidelines.)
Asthma Drops  C10
Provides homeopathic aid in support of alleviating asthmatic occurrences.

Bronchitis Formula  C170
Provides homeopathic aid in relieving symptoms associated with bronchitis.

Carcinosin Miasm Drops  C142
Provides homeopathic aid in stabilizing significant miasmatic terrain disturbance related to classical inherited miasm patterns.

Circulation Drops  C13
Provides homeopathic aid in support of alleviating circulatory disorders.

Cold and Flu Drops  C134
Provides homeopathic aid in relief from flu symptoms: aches, chills, fever and intestinal upset.

Cough Formula  C14
Provides homeopathic aid in support of temporary relief of cough episodes.

Cough Tonic  CCT
Provides homeopathic aid in relief from cough and the common cold; acts as an expectorant.

Cell Energy Performance Drops  C48
Provides homeopathic aid in support of cleansing the body by opening up fat burning pathways.

Cellular Oxygenator  C95
Provides homeopathic regulation of the Kreb's (Citric Acid Cycle). Assists in elevating the vital energy of the body by opening up fat burning pathways.

Cerebral Blood Stim  C86
Provides homeopathic aid in support of promoting circulation to the brain after stroke or injury.

Circulatory Drops  C13
Provides homeopathic aid in support of alleviating circulatory disorders.

Compulsive Eating Formula  C73
Provides homeopathic aid in the treatment of eating disorders such as overeating, habitual eating, binge eating, bulimia and inhibits the appetite.

Cough Tonic  CCT
Provides homeopathic aid in relief from cough and the common cold; acts as an expectorant.

Cough Tonic  CCT
Provides homeopathic aid in relief from cough and the common cold; acts as an expectorant.

Cervical Blood Stim  C86
Provides homeopathic aid in support of promoting circulation to the brain after stroke or injury.

Circulation Drops  C13
Provides homeopathic aid in support of alleviating circulatory disorders.

Circulation Drops  C13
Provides homeopathic aid in support of alleviating circulatory disorders.

Cold and Flu Drops  C134
Provides homeopathic aid in relief from flu symptoms: aches, chills, fever and intestinal upset.

Carcinosin Miasm Drops  C142
Provides homeopathic aid in stabilizing significant miasmatic terrain disturbance related to classical inherited miasm patterns.

Carcinosin Miasm Drops  C142
Provides homeopathic aid in stabilizing significant miasmatic terrain disturbance related to classical inherited miasm patterns.

Carcinosin Miasm Drops  C142
Provides homeopathic aid in stabilizing significant miasmatic terrain disturbance related to classical inherited miasm patterns.

Circulation Drops  C13
Provides homeopathic aid in support of alleviating circulatory disorders.

Carcinosin Miasm Drops  C142
Provides homeopathic aid in stabilizing significant miasmatic terrain disturbance related to classical inherited miasm patterns.

Circulation Drops  C13
Provides homeopathic aid in support of alleviating circulatory disorders.

Carcinosin Miasm Drops  C142
Provides homeopathic aid in stabilizing significant miasmatic terrain disturbance related to classical inherited miasm patterns.

Carcinosin Miasm Drops  C142
Provides homeopathic aid in stabilizing significant miasmatic terrain disturbance related to classical inherited miasm patterns.
DEGEX DROPS C17
Provides homeopathic aid in support of relieving symptoms associated with various respiratory conditions that inhibit breathing.

DYSEC DROPS C16
Provides homeopathic aid in support of relieving symptoms associated with various respiratory conditions that inhibit breathing.

DIGESTIVE ENZYME DROPS C18
Provides homeopathic aid in support of enzyme production, tissue rejuvenation and digestive disorders.

DISTRESS DROPS C121
Provides homeopathic aid in support of assistance with the symptoms of distress and overreaction.

DNA INSULIN DROPS C19
Provides homeopathic aid in support of correcting DNA-affectted diabetes.

DENTAL DROPS C17
Provides homeopathic aid in support of assisting with symptoms of dementia.

DISTORTION DROPS C138
Provides homeopathic aid in support of correcting distortional episodes or tendencies.

DIABETIC SYMPTOMS DROPS C117
Provides homeopathic aid in support of stabilizing metabolic catalyzation.

DEPRESSION C15
Provides homeopathic aid in support of relieving depression in extroverts.

DISPERSION C117
Provides homeopathic aid in support of assistance with the symptoms of depression.

DEPRESSED SYMPTOMS DROPS C117
Provides homeopathic aid in support of stabilizing metabolic catalyzation.

DENTAL DROPS C17
Provides homeopathic aid in support of assisting with symptoms of dementia.

DEMENTIA DROPS C117
Provides homeopathic aid in support of assistance with the symptoms of dementia.

DIGESTIVE DROPS C17
Provides homeopathic aid in support of relieving symptoms associated with various gastrointestinal conditions.

DIGESTIVE DROPS C17
Provides homeopathic aid in support of stabilizing metabolic catalyzation.

DIGESTIVE DROPS C17
Provides homeopathic aid in support of stimulating cellular defense mechanisms and metabolic catalyzation.

DIGESTIVE DROPS C17
Provides homeopathic aid in support of relieving symptoms associated with various gastrointestinal conditions.
GROWTH HORMONE SPRAY C161
Provides a low potency blend of various growth hormone sources.
Growth hormone (low) 3X, Growth hormone (high) 6X, 9X, 12X, purified water, 20% USP alcohol. 1 oz

GH MULTI-POTENCY C162
Provides homeopathic regulation of growth hormone.
Growth hormone 6X, 12X, 30X, 60X, 100X, purified water, 20% USP alcohol. 2 oz

LOW GH PLUS DROPS C165
Homeopathic low potency combination of growth hormone and IGF-1 to assist regulation.
Growth hormone (low) 4X, 7X, 12X, IGF-1 9X, purified water, 20% USP alcohol. 2 oz

GH/IGF-1 HIGH DROPS C166
Homeopathic high potency combination of growth hormone and IGF-1 to assist regulation.
Growth hormone 6X, 9X, 12X, 30X, 100X, IGF-1 30X, 60X, 100X, purified water, 20% USP alcohol. 2 oz

GOUT FORMULA C80
Provides homeopathic aid in relief of the symptoms associated with gout and the predisposition toward excess uric acid.

HEADACHE DROPS C27
Provides homeopathic aid in support of temporary relief from headaches of various origin.
Allium cepa 3X, Gelsemium sempervirens 3X, Belladonna 6X, Nux vomica 4X, Spigelia rhombifolia 6X, Lycopodium clavatum 6X, purified water, 20% USP alcohol. 2 oz

LIQUESCENCES

DRAINAGE & TONIFYING FORMULATIONS

The liquecence series provides remedies in low potencies (1X to 6X) to enhance drainage to specific systems stimulating excretion and exerting a tonifying as well as an energetic effect. The stimulatory effect results from supplying low physiologic levels of these nutritional factors in keeping with the hypothesis of low-dose nutritional therapy. Potencies vary between formulas depending on the ingredients, specific formula and desired action of the blend. Some liquescences also provide medium and higher potency ingredients.

NOSODE ATTENUATIONS

Nosodes are homeopathic attenuations of pathological organs or tissues, causative agents such as bacteria, fungi, ova, excretions or secretions, parasites, virus particles and yeast disease products. Homeopathic nosodes can stimulate the body to recognize a disease-causing entity, provide a level of protection, and assist in the elimination of the pathogens naturally. Nosodes provide a template to the immune system and the cell walls, thus making an indirect attack on diseases by stimulates the immune system and white blood cell production. The use of drainage (see Liquescences on page 20-23) is highly recommended when using nosode attenuations. These are to be administered orally 10 drops three times a day except in the case of highly-sensitive or immune-compromised individuals where imbrication (rubbing into vascular areas of the skin) or a reduced dose and frequency may be best for the first month. These formulas are for the chronic/miasmatic condition.

### SARCODE ENDOCRINE FORMULATIONS

Each PCHF endocrine formulation provides an array of sarcodes (potentized New Zealand glandulars) along with potentized phytotherapeutics, classical remedies and other attenuated agents relevant to the systemic or tissue disturbance addressed by the product. Sarcodes are stimulatory, restorative and assist in the rebuilding function of organ cells. Individual ingredients range from very low (2X) to high (100X) potencies as appropriate in the context of the formula to help balance under- and over-stimulated glands. (Refer to pg. 9 for dosing guidelines.)

XENOBIOtic COMBINATIONS

A Xenobiotic is an ‘abnormal’ or ‘man-made’ material not produced by the body, and thus foreign to it. PCHF’s Xenobiots are designed to assist body detoxification of the increased toxic load from exposure and assimilation today’s environment brings. Xenobiots free the toxins from binding sites in the body. The use of drainage (see Liquescences on page 20-23) is highly recommended when using Xenobiots formulations. In addition, when detoxifying metals and using the Amalgam or Metex Xenobiots, consider using a chelating formula such as PCHF’s Metal Systox for further support. Each PCHF Xenobiotic combination provides an array of isodes and other attenuated agents along with classical and non-classical remedies relevant to the intoxication or infection targeted by the product. The USP defines an isode as an attenuation of botanical, zoological, or chemical substances, including drugs, excipients, or binders, which have been ingested or otherwise absorbed by the body and are believed to have produced a disease or disorder which interferes with homeostasis. Potencies of individual agents range from very low (2X) to very high (1000X), as appropriate in the blend and desired action of the formula. These are to be administered orally 10 drops three times a day, except in the case of highly-sensitive or immune-compromised individuals where imbrication (rubbing into vascular areas of the skin) or other forms of remedy administration would be best for the first month. Please note: X6, X10, X17, X20, X32 or X33 should not be used in the same 24-hour period. (Refer to pg. 9 for dosing guidelines.)

Clinical Note: Best results are obtained when using a ‘Drainage’ remedy. Consider Whole Body Detox, Lymph Stim Liquescence or refer to the ‘Liquescence’ section on page 20-23 in this catalog.

VIAL TEST KITS

Testing Vials Available

Professional Complementary Health Formulas offers test vials for all regular PCHF products distributed. Individual product test vials are available for $1.50 each. Single empty vials in wide or narrow neck are 15¢ each.

PCHF LINE COMPLETE

Does not include those listed under ‘others available’. Includes all PCHF Nutritional, Glandular, Herbal and Homeopathic categories.

655 vials $980

PCHF NUTRITIONAL COMPLETE

Includes all PCHF Nutritional, Glandular and Herbal products.

115 vials $175

PCHF HOMEOPATHIC COMPLETE

Does not include Phenolics, Singulars, Amino Acids, Vet or those under ‘others available’. Includes the most common PCHF Homeopathic products.

420 vials $650

PCHF ALLERSODE

Includes all PCHF Homeopathic Allersodes, Opsins and Allergy Liquesence.

26 vials $40

PCHF AMINO ACIDS

Includes all PCHF Multi-Potency Amino Acids.

30 vials $50

PCHF CELL SALTS

Includes all PCHF Multi-Potency Cell Salts.

13 vials $25

PCHF COMBINATION

Includes all PCHF Homeopathic Combinations.

155 vials $235

PCHF EMOTIONAL

Includes all RET, RCT formulas, color filters, and cross reference wall chart.

32 vials $50

PCHF LIQUESCENCE

Includes all PCHF Homeopathic Liquesence formulas.

39 vials $55

PCHF MYCOTOXIN

Includes all PCHF Homeopathic Mycotoxin formulas.

11 vials $18

PCHF PHENOLS

Includes all PCHF Multi-Potency Phenolics.

46 vials $70

PCHF NOSODE

Includes all PCHF Homeopathic Nosode formulas.

21 vials $30

PCHF SARCODE

Includes all PCHF Homeopathic Sarcode formulas.

33 vials $50

PCHF SINGULARS

Includes all PCHF Multi-Potency Singulars.

41 vials $65

PCHF XENOBIOTIC

Includes all PCHF Homeopathic Xenobiotic formulas.

48 vials $75

PCHF GLANDULAR

Includes all PCHF Glandular combinations and pures.

TOXIC TERRAIN

Traditional medical training emphasizes patient assessment based upon signs and symptoms. Treatment is then aimed at the amelioration of the symptomatology. Unfortunately, like the allopathic approach, even alternative therapy sometimes does little more than suppress the ‘signals’ of the body. Heavy nutritional dosing is acting at a pharmacological level and may actually worsen the symptoms by driving the toxins deeper or by creating a ‘healing crisis’ which stresses an already stressed system. It is helpful to understand the underlying processes that bring about the body’s homeostatic regulatory actions. ‘Dis-ease’ is nothing more than the body’s homeostatic regulatory actions. Understanding ‘homotoxicological’ principles is valuable and describes the stages which the body, is of utmost importance.

Treating our propensity to create these ‘environments’, or the ‘terrain’ of the body, is of utmost importance. Whether we use patient questionnaires, indican tests, blood tests, hair analysis, BEV/BTA analysis, EAV analysis, Darkfield or Applied Kinesiological testing, we must treat the process in a systematic way with goal-oriented testing, we must treat the process in a systematic way with goal-oriented testing. We must realize the disease process is a perfectly normal response to working at work. We must realize the disease process is a perfectly normal response to working at work. We must realize the disease process is a perfectly normal response to working at work.

HUMORAL LEVEL

Excretion Phase. This is the elimination phase in which the body, attempting to maintain homeostasis, will produce increased saliva and gastric juices, sweating, urination and increased bowel action to rid the body of toxins. Suggested treatment at this level would be a first aid symptomatic treatment approach consisting of PCHF nutritionals, botanicals and homeopathic combinations. Reaction Phase. This is the acute phase in which there begins an energetic change when excretion is no longer possible. Endotoxins are being produced by the organism. The body then attempts to produce fever, inflammation, pain and pathological excretions: vomiting, diarrhea, nasal discharges, and supportive discharges. Suggested treatment at this level would be PCHF nutritionals, botanicals, homeopathic combinations and liquescence nutritives. Deposition Phase. There is now a definite ‘energetic’ change and early organ ‘biochemical’ changes. Deposition in the intercellular areas and organ system tissues are affected. Benign entities begin showing aberrant tissue and system function; kidney stones, gallstones, lipomas, and scarring. These are the compensatory mechanisms of the body. Suggested treatment at this level would be PCHF nutritionals and alkalizers, botanicals, homeopathic combinations, liquescence nutritives and liquescence global drainers.

CELLULAR LEVEL

Impregnation Phase. Deposition occurs at the cellular level and cellular function is immediately affected. Energy production and transport systems are now compromised. Compensatory mechanisms now fail. Symptoms such as extreme fatigue and susceptibility to other stressors are evident manifesting as allergies, myalgias and neuropathies. NOTE: In viral infections, this is the initial phase since the virus invades at the cellular level. Suggested treatment at this level would be PCHF nutritionals, alkalizers and antioxidants, oligotherapies, botanicals, homeopathic liquescence specific and global drainers, nosodes and xenobiotics.

Degeneration Phase. Structural changes occur in the cell and are associated with abnormal organ function and structure such as cirrhosis, arthritis, atrophy, and sclerosing often seen in chronic degenerative conditions. Suggested treatment at this level would be PCHF nutritionals, specialities and antioxidant, oligotherapies, botanical supportive and alternatives, homeopathic liquescence specific drainers, nosodes and xenobiotics.

Neoplasm Phase. Abnormal genetic imprinting and reproduction of the cell’s structures and functions are evident. Malignant growth is now being formed and ultimately cellular and organ death. Suggested treatment at this level would be PCHF nutritionals, specialities and antioxidants, degeneration protocols, oligotherapies, botanical supportive and alternatives, homeopathic liquescence specific drainers, nosodes and xenobiotics.

DETOXIFICATION PROTOCOLS

The ‘obstacle to cure’ must be removed. An example of this would be if your lawn shows rust coloration, the probability is that it has a fungus. Treating the lawn with an antifungal spray will kill the fungus, but if nothing is done to improve the drainage or alter the amount of water used, fungal growth will shortly reappear. So, if a patient works in a dimly lit area and suffers from SAD (Seasonal Affective Disorder) and nothing is done to change the lighting, then he/she may need the medication or remedy forever. Or possibly, the day will come when it no longer helps. Therefore, alteration of the life-style and surroundings becomes increasingly important. Reversal of the above mentioned degenerative changes begins with a very specific protocol. We must reverse the trend and return along the same path, ‘regressive vicariation’, that follows Hering’s guidelines to cure. Hering’s guidelines suggest that healing occurs from above-down, inside-out and from the most immediate to the past. This may explain why some people, when detoxifying, will remark they haven’t had these symptoms (i.e., headaches) in years. It also explains why they return to the compensatory symptoms seen earlier in the disease process. We may call this ‘Recompensation’. Unfortunately, these healings are fraught with misunderstandings on the part of the patient. They may feel worse and discontinue therapy too early or blame you. We must acknowledge how much vital energy the patient has and what their recuperative abilities are. A ‘healing crisis’ or ‘aggravation’ is typically a ‘healing crisis’ for the patient and an aggravation to the clinician. Minimizing these early by proper management may save later suppressive therapy just to deal with the unpleasant ‘aggravation’ symptomatology. An analogy is to think of the patient as someone who wishes to work for food. If you work them in the weakened state, you may be disappointed in the speed and quality of the work. On the other hand, if you feed them first and build their strength, they will perform better. Patients with low vital energy or chronicity of the condition will need longer to introduce the remedies which will effect a healing response. To appropriately elicit a ‘reverse vicariation’, it is suggested to open the excretory pathways for 10 days to 3 weeks before introducing a nosode or xenobiotic that may stress their system. Patients with good vital energy and conditions of recent onset can typically withstand more stress that may be brought on by the introduction of a nosode, xenobiotic or a botanical such as a chelagogue. To do this, there are some specific products and protocols to use (see below).

DETOXIFICATION GOALS

1. Remove the Obstacles. First, define and understand the problem. Identifying and removing the ‘stressors’ gets rid of the body’s need to compensate and adapt. Remember that ‘disease’ is a normal state of the body in the pursuit of homeostasis. This understanding allows proper recognition of the pathways and goals that need to be accomplished. Whether it means removing a food from the diet or physically removing one from an environment, the trigger must be moved. Remember that one of the prime guidelines of homeopathy is to ‘remove the obstacle to cure’. History taking and testing procedures may be used at this point to identify the causative factors. At this point, ‘first aid’ protocols such as lower potency homeopathics, PCHF’s multi-potency single homeopathics or PCHF’s combinations could be utilized. Often, emotional factors may be prevalent and be an obstacle in their own regard, so attention and support via PCHF’s Reflex Emotional Therapies should be considered.

2. Improve Respiration. Cellular function depends on the import and export of ionic particles that are converted to intracellular structures and energy production. Microminerals assist in this process as well as improving body-available oxygen via exercise or other means. PCHF’s Oligo ‘ionized’ trace minerals are used for the removal of toxins from binding sites and cellular membrane exchange. Ways to increase cellular respiration is to utilize exercise, stimulate the autonomic nervous system (massage, skin brushing and contrast water therapy, not to mention mobilization and mild exercise) and use specific products to enhance oxygen uptake and mitochondria function such as PCHF’s Cellular Oxygenator, Cell Energy Performance, Oligo Germanium, NADH, Metab, or Antioxidant Complex.

3. Strengthen to Cleanse. Detoxifying can be stressful and not well tolerated by everyone. The systems of many patients are too toxic and they will likely stop the detoxification process.

Some of the specific drainage products for enhancing excretion of toxins are:

Using our ‘Detoxification’ questionnaire will assist you in knowing which specific products to consider.

**NOTE:** Patient management may vary depending upon the condition the patient presents and the experience of the clinician. Many patients can tolerate strengthening and drainage/detoxification at the same time.
prematurely due to an aggravation and worsening of symptoms. The use of botanicals from PCHF’s Botanipure Single Herb Extracts or Complex Formulas to stimulate, PCHF’s disease-, pesticide- and antibiotic-free New Zealand Glandulars to tonify, and general nutrition such as PCHF’s Naturalvite (multivitamin/mineral) for support is suggested to strengthen the patient’s system to the point of being able to tolerate the detoxification process. Reducing the acid load on the body is accomplished with Bio-Terrain Alkaline pH Balance (short-term use) and Vitamin C Ascorbate (long-term use) with Magnesium/ Potassium Complex or Magnesium Complex.

4. Toxin Excretion. Drainage of the organs must be improved once cellular respiration and function is reestablished. Excretion of toxins in the intercellular regions is done via the kidneys, liver, blood, lungs, lymph, skin, and digestive tract. Assisting these excretory systems is important to assure non-reabsorption of the toxins. Without drainage, toxins will often dislodge from their binding sites and reattach elsewhere causing either an aggravation or new disease processes. Low potency homeopathics, PCHF’s Liquescences (see above suggestions), are used to prepare the body for toxin excretion, provide pharmacological effect and energetic stimulation. In weakened individuals, it is suggested to wait approximately 7 to 10 days before continuing to step 5. Steps 1 thru 4 may be performed at the same time, depending on the tolerance of the individual. Symptomatic treatment may also be continued or administered at this time via PCHF’s Homeopathic Multi-Potency Singulaires or Combination formulas.

5. Drawing the Toxins Out. The immune system must recognize the toxins for it to mobilize the body’s mechanisms to excrete them. It has been said that homeopathy provides a blueprint to the body. This recognition is accomplished via the use of PCHF’s Homeopathic Combinations, Nosodes and Xenobiotics. Please note that there may be multiple toxic loads on the body and repetitive use of steps 1 thru 5 may be needed. Proper history and other diagnostic indicators dictate continuance of this approach. Toxin excretion can be considered a trauma by the body and therefore free-radical scavenging occurs. Antioxidant Complex and Bio-Terrain Alkaline or Vitamin C Ascorbate should be continued through the detoxification process as the body will produce free radicals as a by-product. Non-acidic sources of antioxidant such as A,C, E, and Selenium as found in PCHF’s Vitamin C Ascorbate with a near neutral pH is important to protect against free radical effects.

6. Re-Strengthen. Broad nutritional support such as PCHF’s Naturalvite or Antioxidant Complex and botanical stimulation such as Single Herbs or Complex Formulas as well as general glandular tonification, such as PCHF’s Endocrine or Immustim Complex, are suggested. Autonomic stimulation such as massage, skin brushing and contrast water therapy not to mention mobilization and mild exercise programs should be performed to rehabilitate the nervous system.

7. Restore Function. Stimulating and regenerating a previously stressed organ or system is vital and is done by the gradual elimination of PCHF Glandular support replacing it with continuation of an appropriate ‘nutritive’ Liquescence and specific PCHF Oligo and Sarcode formulations. Botanical alteratives should be continued or commenced. These should be continued for several months to alter the terrain and structure of the body.

8. Re-Inoculate. Reestablishing proper flora and terrain is suggested, but should be done gradually to avoid pathogenicity and assist adaptation by the body. Preparing the gut first via PCHF’s homeopathic Microflora Drops and PCHF’s Digestive Enzyme Liquescence is advised and then introducing PCHF’s Acidophilus/Bifidus Plus (nitrogen packed with FOS) followed with PCHF’s Fiber Complex is important. Continuing specific organ support with general nutrition such as PCHF’s Naturalvite or Antioxidant Complex and PCHF’s Glandular/Sarcode therapy is further suggested. Digestive aids such as a bitters complex, Pancreatin 8x Plus, Phyto- Vegezyme (all vegetable, non-Aspergillus digestive enzyme) or DiGest Plus can be added but only in a supportive role.

9. Constitutional Support. With the ‘Obstacles to Cure’ now out of the way, we can concentrate on treating that which originally predisposed this person toward developing their illness and their individual symptom profile manifestation. Botanical alteratives are used long term and classical homeopathy can be considered at this time as well as PCHF’s Miasm Formulas. Please request the ‘Miasm’ formulas article from PCHF.
PCHF goes to great lengths to procure the finest raw materials available, such as the New Zealand glandulars obtained from a bovine source naturally range fed with no pesticides, herbicides or antibiotics, and no hormones for enhanced growth. We use time-honored formulations known to be of high efficacy and apply current knowledge to enhance them. Most practitioners prefer encapsulated products instead of tablets because today’s patient usually enters the office with GI dysfunction making it difficult to assess the level of nutrient actually reaching its target.

PCHF’s products being encapsulated using only vegetarian capsules, along with using only natural and beneficial flow agents such as MCTs (Medium Chain Triglycerides) and specific pH targeted coating, insures the maximum amount of nutrient possible for that patient is utilized. Our vast line of multimodality products is due to our belief that ‘one shoe does not fit all feet’. This allows the practitioner to ‘semi-customize’ a patient’s Homeo-Nutritional program. Our ‘Homeo-Nutritional’ concept suggests using homeopathy synergistically along with nutritional therapy. This often decreases the level of the nutrient required in the therapy as the homeopathic acts as a ‘potentiating’ agent. Using botanical medicines either in conjunction or in combination with the nutrients assists in providing a full spectrum effect in the nutritional blend by the inclusion of synergistic co-factors.

There are many steps involved in creating a highgrade nutraceutical product. This ranges from the procurement of raw materials used in the formulation, to the actual weighing of the formulation and active component levels of the ingredients. PCHF purchases the raw material directly from the original source whenever possible to assure the highest quality and to minimize cost factors that may artificially inflate product costs. Precision and consistency of the blending and encapsulation process insure that one bottle is the same as the next. These various factors are dependent on diligence, honesty and good manufacturing processes, while meeting or surpassing FDA guidelines.
### Nutritional Glandular Combinations

#### ADRENAL COMPLEX (GAC)
Adrenal and spleen lyophilized gland concentrate with synergistic ingredients.
- Vitamin A (fish liver oil) 3500 IU
- Adrenal tissue (lyophilized) 200 mg
- Vitamin C (L-ascorbic acid) 175 mg
- Spleen tissue (lyophilized) 150 mg
- Niacinamide 50 mg
- Pyridoxine (vitamin B6) 10 mg
- Thiamine (vitamin B1) 10 mg
- Zinc (ascorbate) 10 mg
- Riboflavin (vitamin B2) 5 mg
- DHEA (naturally occurring) 60 mcg

60 and 180 capsules

#### COLLAGEN COMPLEX (GCC)
Nutritional support for tendons, ligaments and cartilage.
- Vitamin A (beta-carotene) 2000 IU
- Vitamin E (d-Alpha tocopherol) 30 IU
- Collagen concentrate 200 mg
- Bioflavonoids (citrus sources) 190 mg
- Hesperidin (citrus sources) 190 mg
- Vitamin C (L-ascorbic acid) 100 mg
- Manganese (aspartate) 50 mg
- Bone meal (hydroxyapatite) 50 mg
- Chondroitin sulfate 40 mg
- Calcium (aspartate) 30 mg
- Magnesium (aspartate) 30 mg
- Rutin (buckwheat) 10 mg
- Zinc (aspartate) 10 mg

60 and 180 capsules

#### CARDIO COMPLEX (GCAC)
Heart lyophilized gland concentrate with synergistic ingredients.
- Vitamin E (d-Alpha tocopherol) 30 IU
- Heart tissue (lyophilized) 300 mg
- Hawthorne berries (Crataegus oxyacantha) 100 mg
- Magnesium (aspartate) 50 mg
- Potassium (aspartate) 50 mg
- Turmeric (Curcuma longa) 25 mg
- Astragalus membranaceus 25 mg

60 capsules

#### ENDOCRINE COMPLEX (GEC)
multiple lyophilized gland concentrate
- Liver tissue (lyophilized) 300 mg
- Brain tissue (lyophilized) 225 mg
- Stomach tissue (lyophilized) 90 mg
- Heart tissue (lyophilized) 70 mg
- Kidney tissue (lyophilized) 70 mg
- Pancreas tissue (lyophilized) 40 mg
- Spleen tissue (lyophilized) 26 mg
- Duodenum tissue (lyophilized) 18 mg
- Thyroid tissue (lyophilized) 7 mg
- Adrenal tissue (lyophilized) 4 mg
- Thymus tissue (lyophilized) 4 mg
- Parotid tissue (lyophilized) 2 mg
- Pineal tissue (lyophilized) 1 mg
- Pituitary tissue (lyophilized) 1 mg
- Hypothalamus tissue (lyophilized) 1 mg

60 capsules

#### IMMUSTIM COMPLEX (GIMC)
Multiple lyophilized gland concentrate with synergistic support.
- Vitamin A (fish liver oil) 7500 IU
- Vitamin E (d-Alpha tocopherol) 50 IU
- Vitamin C (L-ascorbic acid) 100 mg
- Echinacea purpurea 50 mg
- Lymph tissue (lyophilized) 40 mg
- Spleen tissue (lyophilized) 40 mg
- Thymus tissue (lyophilized) 40 mg
- Bee pollen 25 mg
- Placenta tissue (lyophilized) 25 mg
- Bone marrow (lyophilized) 20 mg
- Parotid tissue (lyophilized) 20 mg
- Adrenal tissue (lyophilized) 10 mg
- Zinc (aspartate) 10 mg

60 and 180 capsules

#### GI COMPLEX (GGC)
Stomach and duodenum lyophilized gland concentrate with synergistic support.
- Duodenum tissue (lyophilized) 300 mg
- Stomach tissue (lyophilized) 300 mg
- Anise seed (Pimpinella anisum) 50 mg
- Cabbage (Brassica oleracea) 50 mg
- Clove (Syzygium aromaticum) 50 mg
- Ribwort (Plantago lanceolata) 50 mg
- Vitamin C (L-ascorbic acid) 50 mg
- Slippery elm (Ulmus fulva) 25 mg

60 capsules

#### HEMATO COMPLEX (GHC)
Liver and spleen lyophilized gland concentrate with synergistic support.
- Liver tissue (lyophilized) 500 mg
- Vitamin C (L-ascorbic acid) 100 mg
- Spleen tissue (lyophilized) 50 mg
- Iron (aspartate) 30 mg
- Niacin (vitamin B3) 30 mg
- Astragalus membranaceus 25 mg
- Pyridoxine (vitamin B6) 5 mg
- Copper (aspartate) 2 mg
- Folic acid 400 mcg
- Cyanocobalamin (vitamin B12) 100 mcg

60 capsules

#### LYMHP/SPLEEN COMPLEX (GLSC)
Lymph and spleen lyophilized gland concentrate with synergistic support.
- Lymph tissue (lyophilized) 250 mg
- Vitamin C (L-ascorbic acid) 125 mg
- Spleen tissue (lyophilized) 125 mg
- Magnesium (aspartate) 50 mg
- Echinacea purpurea 50 mg
- Lobelia inflata 5 mg
- Manganese (aspartate) 5 mg
- Zinc (aspartate) 5 mg
- Copper (aspartate) 1 mg

60 and 180 capsules
**METABOLIC COMPLEX**  
Metabolic (lyophilized gland concentrate with synergistic support.
- Tyrosine (lyophilized) 250 mg
- Kelp (Alaria esculenta) 100 mg
- Thyroid tissue (lyophilized) 60 mg
- Anterior pituitary tissue (lyophilized) 15 mg
- Zinc (aspartate) 15 mg
- Hypothalamus tissue (lyophilized) 5 mg
- Copper (aspartate) 1 mg
- Iodine (kelp) 100 mcg

**OSSEOUS-APATITE COMPLEX**  
Microcrystalline hydroxyapatite from lyophilized calf bone tissue matrix.
- Vitamin D3 (calciferol) 1000 IU
- Microcrystalline-Hydroxyapatite 500 mg
- Calcium (from bone tissue matrix) 125 mg
- Horsestail grass (Equisetum arvense) 50 mg
- Silicon (aspartate) 10 mg
- Boron (aspartate) 200 mcg
- Vanadium (aspartate) 75 mcg
- Molybdenum (aspartate) 50 mcg

**NEURO MEDULLA COMPLEX**  
Medulla lyophilized gland concentrate with synergistic support.
- Amino acid concentrate 200 mg
- Medulla tissue concentrate (lyophilized) 100 mg
- Choline 25 mg
- GABA 10 mg
- Ginkgo biloba 10 mg
- Thiamine (vitamin B1) 6 mg
- Phosphatidyl serine 5 mg

**NEW ZEALAND RANGE**  
New Zealand rangeland

**OVARIAN COMPLEX**  
Ovarian and uterus lyophilized gland concentrate with synergistic support.
- Vitamin A (fish liver oil) 500 IU
- Vitamin E (d-Alpha tocopherol) 30 IU
- Ovarian tissue (lyophilized) 100 mg
- Uterus tissue (lyophilized) 100 mg
- Chaste tree (Vitex agnus castus) 25 mg
- Damiana (Turnera diffusa) 15 mg
- Zinc (aspartate) 15 mg
- Pituitary tissue (lyophilized) 60 capsules

**PANCREAS COMPLEX**  
Pancreas lyophilized gland concentrate with synergistic support.
- Pancreas tissue (lyophilized) 450 mg
- Pancreatin (4X) 50 mg
- Niacin (vitamin B3) 15 mg
- Pyridoxine (HCL) (vitamin B6) 15 mg
- Thiamine (vitamin B1) 15 mg
- Chromium (GTF-niacin glutathione) 200 mcg
- Vanadyl sulfate 100 mcg
- Selenium (aspartate) 25 mcg

**PARATHYROID COMPLEX**  
Parathyroid and spleen lyophilized gland concentrate with synergistic ingredients.
- Vitamin D3 (calciferol) 400 IU
- Calcium (aspartate) 100 mg
- Magnesium (aspartate) 100 mg
- Spleen tissue (lyophilized) 50 mg
- Parathyroid tissue (lyophilized) 5 mg

**PITUITARY COMPLEX**  
Pituitary lyophilized gland concentrate with synergistic ingredients.
- Hypothalamus (lyophilized) 80 mg
- Magnesium (aspartate) 50 mg
- Pantothenic acid (vitamin B5) 30 mg
- Zinc (aspartate) 12 mg
- Ginkgo biloba 10 mg
- Chaste tree (Vitex agnus castus) 10 mg
- Manganese (aspartate) 8 mg
- Hypothalamus/Pituitary tissue (lyophilized) 2 mg
- Folic acid 400 mcg
- Cobalamin (vitamin B12) 50 mcg

**PNEUMO COMPLEX**  
Lung lyophilized gland concentrate with synergistic ingredients.
- Vitamin A (fish liver oil) 4000 IU
- Vitamin E (d-Alpha tocopherol) 60 IU
- Vitamin C (L-ascorbic acid) 500 mg
- Lung tissue (lyophilized) 200 mg
- Eucalyptus (Eucalyptus globulus) 75 mg
- Goldenseal (Hydrastis canadensis) 75 mg
- Star anise (Illicium anisatum) 5 mg
- Apricot seed (Prunus armeniaca) 5 mg
- Bupleurum (Bupleurum falcatum) 5 mg

**PROSTATE COMPLEX**  
Prostate and orchic lyophilized gland concentrate with synergistic ingredients.
- Vitamin A (fish liver oil) 4000 IU
- Vitamin E (d-Alpha tocopherol) 30 IU
- Orchic tissue (lyophilized) 150 mg
- Prostate tissue (lyophilized) 115 mg
- Bee pollen 50 mg
- Saw palmetto (Serenoa serrulata) 50 mg
- Pygeum (Pygeum africanum) 25 mg
- Zinc (aspartate) 15 mg

**RENAL COMPLEX**  
Kidney lyophilized gland concentrate with synergistic support.
- Vitamin A (fish liver oil) 4000 IU
- Vitamin E (d-Alpha tocopherol) 30 IU
- Vitamin C (L-ascorbic acid) 100 mg
- Dandelion (Taraxacum officinale) 50 mg
- Buchu (Barosma betulina) 50 mg
- Horsestail (Equisetum arvense) 50 mg
- Bearberry (Arctostaphylos uva-ursi) 50 mg

**THYRO COMPLEX**  
Thyroid Lyophilized Gland Concentrate with Synergistic Endocrine Support.
- One capsule contains:
  - Thyroid tissue (lyophilized) 35 mg
  - Adrenal tissue (lyophilized) 25 mg
  - Pituitary tissue (lyophilized) 13 mg
  - Spleen tissue (lyophilized) 5 mg
  - Thymus tissue (lyophilized) 5 mg
  - Hypothalamus (lyophilized) 5 mg

**TRANQUIL COMPLEX**  
Brain lyophilized gland concentrate with synergistic ingredients.
- Brain tissue (lyophilized) 200 mg
- Passion flower (Passiflora incarnata) 200 mg
- Valerian (Valeriana officinalis) 100 mg
- Vitamin C (L-ascorbic acid) 75 mg
- Niacinamide 50 mg
- Magnesium (aspartate) 25 mg
- Niacin (vitamin B3) 25 mg
- Pyridoxine (HCL) (vitamin B6) 25 mg
- S-HTP 20 mg
- Riboflavin (vitamin B2) 10 mg
- Kava (Piper methysticum) 10 mg
- Zinc (amino acid chelate) 5 mg
- Chromium (GTF-niacin glutathione) 25 mcg

PCHF uses only New Zealand bovine glandulars for purity and activity. No antibiotics, hormones or pesticides are used in this New Zealand source. The minister of New Zealand guarantees this source to be free of disease.
PURE CALM MALKA
Effervescent Magnesium Potassium blend formulated for maximum absorption, with natural Stevia, raspberry, and lemon flavors.

One teaspoon provides:
- Magnesium 200 mg
- Potassium 150 mg
- Vitamin C (ascorbate) 75 mg
- Fiber 25 mg
- Riboflavin (Vitamin B2) 10 mcg

Mix one teaspoon with water.

56 servings per container.

8 oz

MAGNESIUM COMPLEX MMGC
Pure elemental Magnesium and Potassium.

MAGNESIUM/CALCIUM MMCC
Nutritional supplement/antacid in a creamy, smooth emulsion with a natural mint flavor.

One tablespoon (16.65 grams) provides:
- Vitamin D3 (calciferol) 100 IU
- Calcium (carbonate) 600 mg
- Magnesium (oxide) 300 mg
- Potassium bicarbonate 25 mg

12 fl. oz.

90 and 180 capsules
OLIGO ELEMENTS IONIZED MICROMINERALS

Oligo Elements are ionically charged mineral particles of one micron or less in diameter. They are precisely made in a laboratory in parts per million, suspended in a liquid glycerin aqueous solution and administered sublingually. Oligo elements work by normalizing blocked enzyme and imbalanced hormonal function in order to regulate homeostasis. At the cellular level, these elements enhance enzymatic functions through a multiplicity of interactive mechanisms. Precise administration enhances cellular respiration and exchange to excrete toxins and allow proper nutrition into the cell.

ALUMINUM

Supplies free ionic aluminum at .014 mg aluminum gluconate per dose, .02 mg per ml and 1.2 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

BORON

Supplies free ionic boron at .0075 mg boron oxide per dose, .0107 mg per ml and .643 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

CALCIUM

Supplies free ionic calcium at .35 mg of calcium lactate per dose, .5 mg per ml and 30 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

CHROMIUM

Supplies free ionic chromium at .14 mcg of chromium chloride per dose, .02 mg per ml and 1.2 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

COBALT

Supplies free ionic cobalt at .01575 mg of cobalt gluconate per dose, .0225 mg per ml and 1.35 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

COLOIDAL SILVER

Micronized Colloidal Silver 0.075 mg per dose, .025 mg per ml, 1.5 mg per bottle, in an aqueous solution.

COPPER

Supplies free ionic copper at 1.813 mg of copper gluconate per dose, 2.59 mg per ml and 155.4 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

COPPER/GOLD/SILVER

Supplies free ionic copper, gold, and silver at .01575 mg of copper gluconate, .00049 mg of colloidal gold, and .00749 mg of colloidal silver per dose in a 10% USP alcohol and 8% glycerin aqueous solution.

FLUORINE

Supplies free ionic fluoride at .1547 mg of sodium fluoride per dose, .221 mg per ml and 13.26 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

IODINE

From alfalfa and sea dulse. One drop provides:

- Iodine (potassium) 150 µg
- In a base of glycerin, alfalfa extract, and sea dulse extract.

MINERAL COMPLEX

Balanced pure elemental multi-mineral.

**Nutritional Oligo Therapy**

**Germanium**
Supplies free ionic germanium at .0005 mg of germanium lactate per dose, .0007 mg per ml and .0042 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Gold**
Supplies colloidal gold at .00049 mg per dose, .0007 mg per ml and .0042 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Iodine**
Supplies free ionic iodine at .01099 mg of potassium iodide per dose, .0157 mg per ml and .942 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Iron**
Supplies free ionic iron at .1953 mg of iron gluconate per dose, .279 mg per ml and 16.74 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Magnesium**
Supplies free ionic magnesium at .623 mg of magnesium gluconate per dose, .89 mg per ml and 53.4 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Manganese**
Supplies free ionic manganese at .2065 mg manganese gluconate per dose, .295 mg per ml and 17.7 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Manganese/Cobalt**
Supplies free ionic manganese and cobalt at .2065 mg of manganese gluconate and .1939 mg of cobalt gluconate per dose in a 10% USP alcohol and 8% glycerin aqueous solution.

**Manganese/Copper**
Supplies free ionic manganese and copper at .2065 mg of manganese gluconate and .1813 mg of copper gluconate per dose in a 10% USP alcohol and 8% glycerin aqueous solution.

**Manganese/Copper/Cobalt**
Supplies free ionic manganese, copper and cobalt at .2065 mg of manganese gluconate, .1813 mg of copper gluconate and .1939 mg of cobalt gluconate per dose in a 10% USP alcohol and 8% glycerin aqueous solution.

**Molybdenum**
Supplies free ionic molybdenum at 1.4 mg of ammonium molybdenum per dose, .02 mg per ml and 1.2 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Nickel/Cobalt**
Supplies free ionic nickel and cobalt at .1946 mg of nickel gluconate and .1939 mg of cobalt gluconate per dose in a 10% USP alcohol and 8% glycerin aqueous solution.

**Phosphorus**
Supplies free ionic phosphorus at .049 mg of dibasic sodium phosphate per dose, .07 mg per ml and 4.2 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Potassium**
Supplies free ionic potassium at .084 mg of potassium gluconate per dose, .12 mg per ml and 7.2 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Selenium**
Supplies free ionic selenium at .14 mg of sodium selenite per dose, .02 mg per ml and 1.2 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Silver (5 PPM)**
Supplies free ionic colloidal silver at .025 mg per dose, .005 mg per ml and 6 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

(also available in a 25ppm 2 oz size)

**Sulphur**
Supplies free ionic sulphur at .105 mg of sodium thiosulfate and 2.8 mg sodium bicarbonate per dose in a 10% USP alcohol and 8% glycerin aqueous solution.

**Vanadium**
Supplies free ionic vanadium at .015 mg of vanadium sulfate per dose, .021 mg per ml and 1.286 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Zinc**
Supplies free ionic zinc at .1645 mg of zinc gluconate per dose, .235 mg per ml and 14.1 mg per bottle in a 10% USP alcohol and 8% glycerin aqueous solution.

**Zinc/Copper**
Supplies free ionic zinc and copper at .1645 mg of zinc gluconate, .1646 mg of nickel gluconate and .1939 mg of cobalt gluconate per dose in a 10% USP alcohol and 8% glycerin aqueous solution.

PROTEINS & AMINO ACIDS

PCHF provides the practitioner a choice of high potency, high quality delivery of protein and amino acid products. The Amino Acid Complex consists of free form and branched chain peptide bonded amino acids from a hydrolyzed whey protein (lactalbumin) source. This combination optimally assists the body in repair, retention of nitrogen and maintaining lean body mass. Protein Complex is a hydrolyzed soy protein (lactalbumin) source. The Protein Vitamin Mineral Complex provides a daily serving of the necessary amino acids, vitamins, and minerals, and is designed to be taken over a long period of time. Finally, the Rice/Pyruvate Protein Complex is a natural choice to sustain body mass while losing weight. All soy sources used are certified GMO-free.

AMINO ACID COMPLEX

Rich source of essential Amino Acids derived from whey.

Typical Amino Acid Analysis per capsule:
- L-Glutamic acid 138 mg
- L-Lysine 50 mg
- L-Leucine 70 mg
- L-Proline 66 mg
- L-Isoleucine 70 mg
- L-Valine 39 mg
- L-Isoleucine 42 mg
- L-Serine 22 mg
- L-Methionine 29 mg
- L-Phenylalanine 22 mg
- L-Glycine 22 mg
- L-Threonine 19 mg
- L-Valine 14 mg
- L-Glutamine 14 mg
- 90 capsules

PROTEIN VITAMIN MINERAL COMPLEX SUPPLEMENT

Fat and cholesterol free hypo-allergenic vitamin, mineral & soy protein complex powder with vanilla flavor.

Typical Vitamin/Mineral/Amino Acid Analysis Per Serving (3 Tbsp):
- Protein 16 grams
- Carbohydrates 3 grams
- Sugar 2.3 grams
- Dietary Fiber 0.6 grams
- Vitamin A (palmitate/beta carotene) 18,000 IU
- Vitamin D (ergocalciferol) 500 IU
- Vitamin E (tocopherol) 400 IU
- Vitamin K (menadione) 20 mcg
- Vitamin C (ascorbic acid) 750 mg
- Vitamin B12 (cyanocobalamin) 25 mcg
- Biotin 100 mcg
- Folic acid (folic acid) 400 mcg
- Pantothenic acid (d-calcium pantothenate) 100 mg
- Riboflavin (vitamin B2) 25 mg
- Thiamine (thiamine) 25 mg
- Niacin (niacinamide) 75 mg
- Pyridoxine (vitamin B6) 25 mg
- Zinc (citrate) 50 mg
- Copper (copper) 100 mcg
- Manganese (manganese) 20 mcg
- Iodine (iodide) 180 mcg
- Magnesium (magnesium) 500 mg
- Calcium (calcium) 500 mg
- Potassium (potassium) 100 mg
- Sodium (sodium) 73 mg
- 16 oz powder

PROTEIN COMPLEX APCC

Low fat and cholesterol free protein (soy) powder with B Vitamins. Vanilla flavored.

Typical Vitamin/Mineral/Amino Acid Analysis Per Serving (4 Tbsp):
- Protein 20 grams
- Carbohydrates 5 grams
- Fat 1 gram
- Sugar 4.5 grams
- Dietary Fiber 0.5 grams
- Thiamine (thiamine) 4 mg
- Riboflavin (riboflavin) 4 mg
- Niacin (niacinamide) 20 mg
- Pyridoxine (thiamine) 2 mg
- Calcium (calcium) 10 mg
- Pantothenic acid (pantothenic acid) 1 mg
- Biotin 100 mcg
- Biotin (biotin) 100 mcg
- Folic acid 400 mcg
- Cyanocobalamin (cyanocobalamin) 25 mcg
- Biotin 100 mcg
- Folic acid 400 mcg
- 16 oz powder

RICE/PYRUVATE APRCP

A protein supplement to enhance energy and thermogenesis.

One serving size (4 Tbsp) contains:
- Protein 11 grams
- Carbohydrates 18 grams
- Fat 17 grams
- Sugar 2 grams
- Sodium 60 mg
- Carbohydrates 18 grams
- Other Ingredients: Rice Protein Combination Isolate, Calcium Pyruvate (1 gram), Fructose, Guar Gum, MCTs (1 gram), Natural Flavoring. 16 oz powder

VITAMIN FORMULAS

The Vitamin formulations range from single ingredient products to synergistically blended combinations. We have made every effort to provide the highest quality at an affordable price. Carefully weighing the choices of raw materials, flow agents and types of delivery enables us to provide you a superior product. Wherever possible, we have blended herbas into the formulations as we believe it is better to provide as close to the natural state as possible. (Note: Mineral amounts are listed as the bioavailable elemental amount.)
