

Dear Consumer,

We believe natural medicines should be taken under the supervision of an experienced healthcare professional who plays a vital role in assessing your health and selecting the right products for you.

Accordingly, only certified healthcare professionals are authorized to purchase our products and they are not allowed to resell them in a retail setting or online.

If you see our products for sale online, you should know that the seller did not obtain the products legitimately. As a result, we cannot confirm the authenticity or condition of these products.

For all of these reasons, we would strongly discourage you from purchasing our products anywhere - except from a healthcare professional with whom you have a relationship. By avoiding illegitimate online sellers, you are safeguarding your own health and you are joining us and your practitioner in the fight to protect high quality natural medicines.

If you have questions about a specific reseller or our policy, please feel free to call us at 503.479.3150.

In health,

Customer Relations Manager
